

# Stakeholder Map

Following the example provided, complete the white boxes by filling in the key motivators and concerns for each stakeholder based on their priorities and role in the company. Then, copy and paste one of the following icons and place in the space provided to prioritize stakeholder input into three categories:

Daniel  
Head of Sales

Motivators

- Expand customer base to increase sales
- Offer competitive purchasing options
- Easy-to-sign agreement process

Concerns

- Impact of delayed revenue on sales goals
- Extended time between purchases during repayment period
- Time to train sales team members

Elie  
Chief Financial Officer

- Securing sustainable financial growth and maximizing long-term profitability via high-velocity revenue streams.
- Balancing digital revenue model innovation with strict corporate fiscal responsibility.

- Capital Allocation & Default Risk:** Managing the high default rates (up to 40%) typical of underdeveloped payment structures.
- Cash Flow Strain:** Floating the multi-year credit gap as immediate point-of-sale cash drops and accounts receivable surges.

Raj  
Chief Technology Officer

Accelerating large-scale digital transformation and optimizing enterprise IT architectures. Delivering robust customer-facing technical solutions that scale efficiently.

**System Integration:** Upgrading legacy billing platforms to dynamically handle automated split monthly installment tracking.  
**Cybersecurity & Compliance:** Protecting sensitive user financial profiles and data under localized encryption frameworks.

Michael  
Chief Marketing Officer

Boosting brand equity, expanding global market positioning, and deepening customer loyalty. Ensuring purchasing models match modern consumer expectations for personalized, budget-friendly choices.

**Brand Perception & Friction:** Minimizing customer churn driven by predatory competitive sign-on offers.  
**Transparency Requirements:** Preventing customer disillusionment by eliminating complex terms or hidden fees that hurt trust

Asha  
Chief Operating Officer

Driving day-to-day process optimization, supply chain velocity, and operational excellence at scale. Protecting business continuity and optimizing structural operating expenses (OpEx).

**Operational Feasibility:** Escalating support times and customer service overhead to manage accounts, disputes, and payment defaults.  
**Cross-Department Alignment:** Managing the operational timeline friction between sales targets and backend financial validation.
